

SUMMARY

Data driven and performance aware software engineer who strives to deliver value. Experienced in data science/engineering, backend development, electronic trading, and web development. Champion of business process simplification and automation.

SKILLS

- Data engineering and automation with **Python 3**, **SQL (Teradata)**, **Linux**
- Relational databases, **SQL**, **PL/SQL** (Teradata, Oracle, MS SQL Server, Db2), **MongoDB**
- Small team leadership, collaboration with **Git**, **GitHub**, **Jira**, **Confluence**
- Full stack web development, data-oriented and object-oriented design with **C++** and **Java**

WORK EXPERIENCE

Analyst Data Science, Culture and Conduct – *RBC Digital & Personal Distribution, Toronto ON* Nov 2023 – Current

- Primary developer of automation project which transforms multiple data sources related to client profile accesses into consumable triage reports and automates email drafts for escalations to RVPs, simplifying identification and escalation of privacy breaches
- Maintaining existing programs by fixing defects in Tableau dashboards, SQL and Python components

Analyst, Technical Regulatory Delivery – *RBC Regulatory Strategy & Delivery, Toronto ON* Apr 2023 – Nov 2023

- Operationalizing client privacy monitoring control by applying automation and data modelling skills, enabling the rollout of the initiative to all regions in Canada

Software Developer Intern – *RBC Capital Markets (QTS), Toronto ON* Jan 2023 – Apr 2023

- Ensured regulatory testing requirements were met by applying electronic trading and Java skills to deliver enhancements to existing simulation/testing software (Ragnarok), mitigating financial penalty risk
- Worked closely with main automation engineer to improve regression testing for new releases by applying electronic trading and C++ skills to upgrade internal testing toolkit, resulting in richer and more automatic testing process

Data and Reporting Analyst – *RBC Regulatory Strategy & Delivery, Toronto ON* May 2022 – Jan 2023

- Streamlined CDIC attestation business process by applying data modelling, data analysis and SQL skills to implement a vendor's data collaboration solution, *reducing time spent from 200h in 2021 to just 10h in 2024 and 5h in 2025 (yes, really)*

PROJECTS

swan – [GitHub Repo](#) | *Tech Stack: C++, Dear ImGui*

- Developed a desktop GUI app to replace the Windows File Explorer with faster performance, power-user features and superior ergonomics - my daily driver for file management

Langton's Ant Explorer – [GitHub Repo](#) | *Tech Stack: C++*

- Discovering complex Langton's Ant patterns by applying C++ and performance-aware programming skills

Cstructure – [GitHub Repo](#) | *Tech Stack: TypeScript*

- Led team of 2 in agile development of code formatter for the C programming language, resulting in a productivity tool which is easier to configure and use than popular alternatives such as clang-format

EDUCATION

Computer Programming Diploma, High Honours – *Seneca College, Toronto ON*

Sep 2019 – Dec 2022

4x President's Honour List Recipient
